

ANNOUNCING THE EUROPEAN LAUNCH OF THE TZ CENTURION™ MICRO SECURITY AND SENSING PLATFORM

SOPHIA ANTIPOLIS, NICE, FRANCE - June 24th, 2010 - TZ Infrastructure Protection Inc., a TZ Limited business, today announces the European launch of TZ Centurion™, its stand alone cabinet-level security and environmental sensing platform at the Data Centres Europe 2010 conference in Sophia Antipolis, near Nice, France.

TZ Centurion is a scalable electronic locking, environmental monitoring and audit trail platform, specifically designed to meet the most stringent regulatory and industry compliance needs of the IT and Telecom industries. It addresses the increasing demand for permissions-based security and environmental sensing capabilities at the physical assets level. TZ's patented and network addressable electronic locks are managed from a central software application and allow industry leading scalability to reduce overall system cost and retrofit into a wide range of enclosures and cabinet systems.

"After establishing a positive track record of performance capability with global pilot customers and after the successful launch in North America, we are now introducing TZ Centurion to the markets in Europe, Middle East and Africa", says Maarten van Duijn, Vice President of TZ Infrastructure Protection Inc. "From our regional office in Amsterdam, The Netherlands, we will distribute and support the platform for our customers in the Data Center and Telecom industries, and our team of software engineers will be able to integrate TZ Centurion seamlessly with other core business applications.

Data Centres Europe is taking place at the Espaces Antipolis, near Nice, France and focuses on both data centers and their enterprise customers who have evolving outsourcing needs as emerging private clouds, new technologies and market shift impact across the sector. According to John Wilson, CEO of TZ Limited, the company believes that "we are launching TZ Centurion at just the right moment at the right place, as we provide Security, Hosting and Facility Managers the remote security and sensing capabilities they very much need because of these increasing outsourcing needs".

About TZ Infrastructure Protection Inc.

TZ Infrastructure Protection, Inc. is an operating business unit of Telezygology, Inc., the leader in the development of smart system solutions that enable localized locking, sensing, switching, remote actuation and networking of intelligent objects under the control of an open software platform. Telezygology, Inc. is a wholly owned subsidiary of TZ Limited, an Australian public company listed on the Australian Stock Exchange (ASX:TZL). Through its two subsidiaries, Telezygology, Inc. and Product Development Technologies, Inc., TZ Limited employs over 130 professional resources deployed across eight international

locations, in businesses focused on technology commercialization and multi-disciplinary design and engineering services.
